

WEIGH CAMELS USING A MEASURING TAPE

Measuring Steps (write down):

1. Measure shoulder height in metres (write this down)
2. Measure Chest GIRTH (circumference).
3. Measure Hump Girth (circumference) in meters
4. Then multiply shoulder measurements with chest measurements, then chest with hump THEN multiply this result with 50kg - This equals the camels total body weight.

Once you have your camels weight you can convert this into pounds if needed.

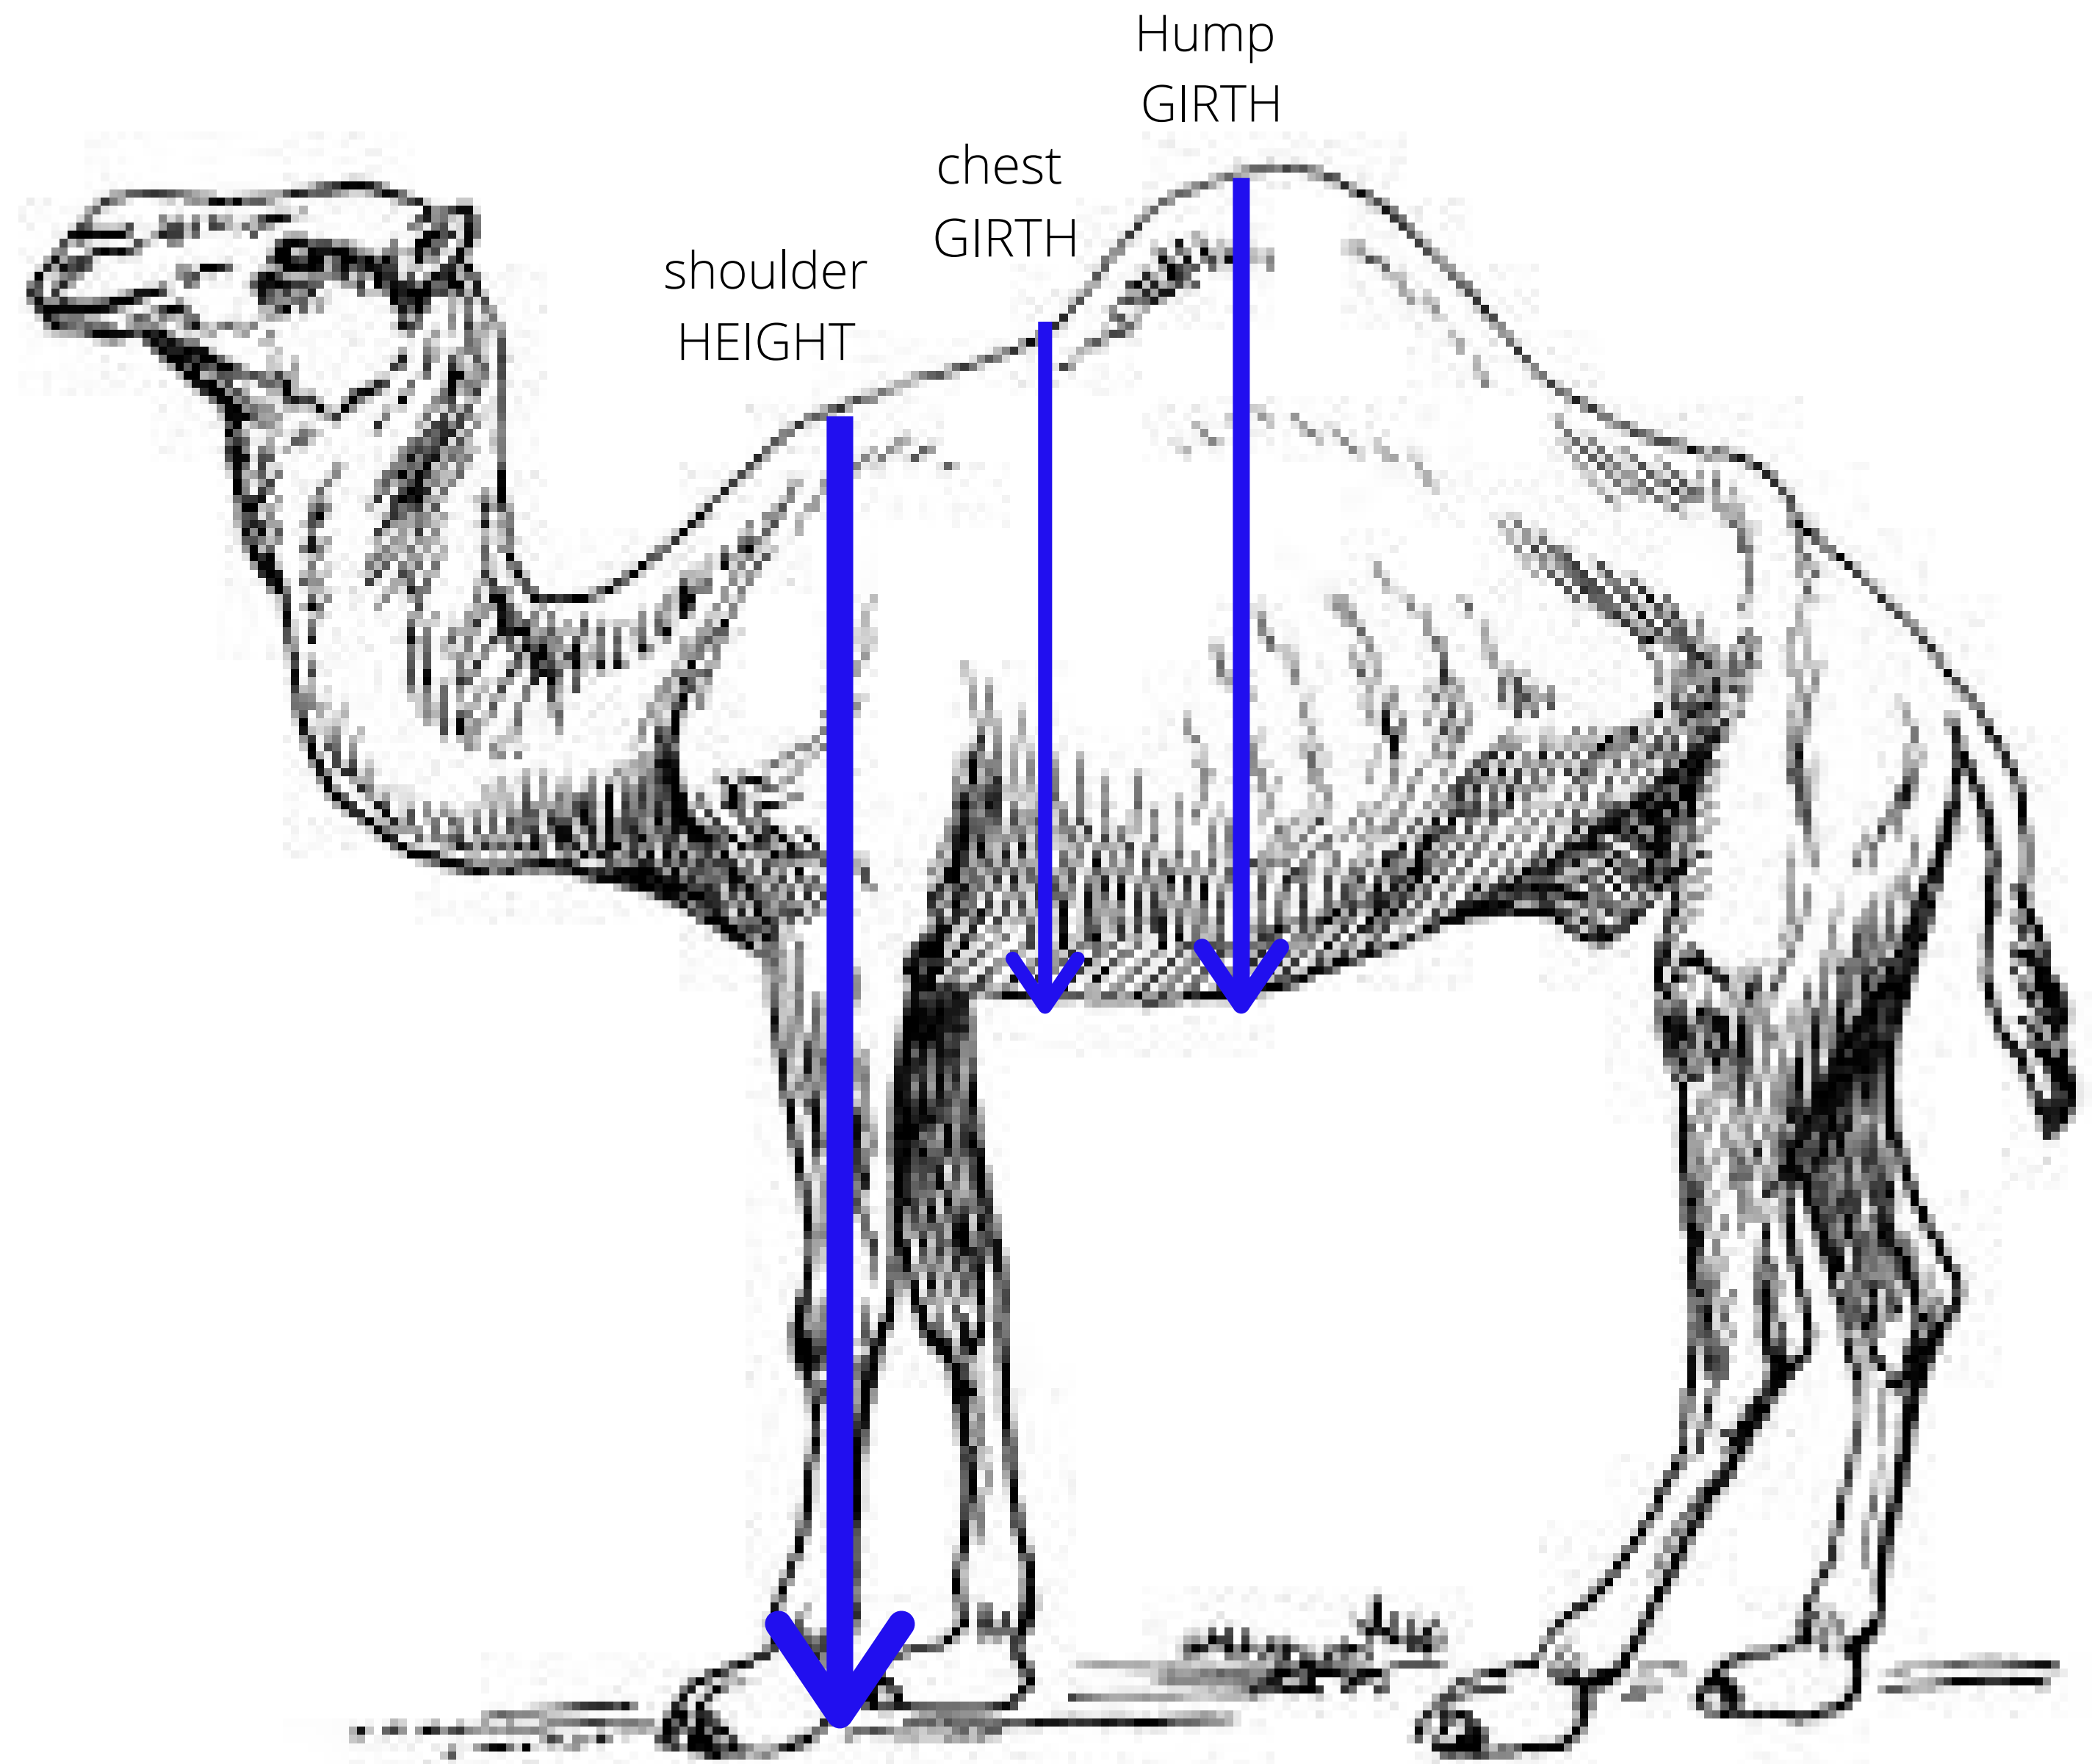

WEIGH CAMELS USING A MEASURING TAPE

Example of Steps:

1. Shoulder height 1.87 meters
2. Chest Girth (circumference): 2.26 metre
3. Hump Girth (circumference) 2.70 meters

RESULT:

$1.87 \times 2.26 \times 2.70 \times 50 =$
 570kg
camels total body weight

Once you have your camels weight you can convert this into pounds if needed (simply use google convert)
